Who we are

We are Grupo HL, formerly HL Ingenieros: a company with experience since 1968 in the domestic and international market, with projects in energy, water, mining, cement, oil and gas, industry and infrastructure.

We offer complete construction solutions that integrate civil works and electromechanical installation, with a single team accountable from start to finish.

MISSION

Managing construction projects creating value and trust.

VISION

Our value proposition will exceed our clients' expectations, with early delivery of their projects and the best safety performance in the industry.

Values

Transparency
In all our business.

Commitment
To clients, suppliers and subcontractors.

Delivery
On schedules, specifications and budgets.

Development
Professional and economic growth for our workers.

Safety
High industrial safety standards on every project.

Service lines

A · MANAGEMENT

EPC and turnkey

We deliver the complete project, from engineering to commissioning, handing over a fully operational production plant.

Project management

We plan, schedule and control every project as a whole, from concept to commissioning.

B · CONSTRUCTION AND INSTALLATION

Industrial civil works

We directly execute the civil works for industrial plants and for public and private projects.

Mechanical and piping installation

We install process equipment and its structures to build new plants or upgrade existing production lines.

Electrical installation and instrumentation

We install the electrical power and control system and the instrumentation needed to commission each project.

C · FABRICATION AND MAINTENANCE

Metal fabrication

We fabricate capital goods for industry, choosing the best solution for each specialty, the logistics and the trade agreements of each country.

Maintenance and plant shutdowns

We carry out major maintenance of production plants and treat every shutdown as a project with very tight deadlines.

Sectors

Cement

Electromechanical installation and civil works for cement production lines, in Colombia and abroad.

Mining

Port expansion works and process plant construction for mining projects.

Water and energy

Civil construction and electromechanical installation for thermal power plants, wastewater treatment plants (WWTP) and drinking water treatment plants, among others.

Oil and gas

Civil works, pipe prefabrication, installation of well flowlines and tie-ins for dehydration plants, among others.

Infrastructure

Projects with companies in the steel and infrastructure sectors.

Industrial

Construction and installation of new plants and expansions for the food, consumer goods and manufacturing industries.
